

Waterproof pH/ORP Pen

Versatile Pen has interchangeable probe modules for pH or ORP measurements

**pH model 05070 shown above*

Common Features:

- Waterproof multi-application pH/ORP pens with interchangeable probe modules are available in 3 versions:
 - Model 05070** includes a pH module for pH measurements
 - Model 05072** includes an ORP module for mV measurements
 - Model 05074** includes a BNC module to accept a standard pH electrode with BNC connector & cable
- Large 3-1/2 digit LCD displays in pH or mV units
- Data validation indicators show user the reading is stabilized
- Automatic Shut-Off to save battery life
- Low Battery indication alerts user to replace batteries
- Dimensions: 1.4 x 6.8 x 1.6" (35.6 x 172.7 x 40.6mm);
Weight: 3.85oz (110g)
- Each model includes an electrode module with protective sensor cap, four LR44 button batteries and neckstrap

**BNC model 05074 shown above (electrode sold separately)*

pH Features:

- Measures from 0.00 to 14.00pH
- Highest pH pen resolution of 0.01pH and accuracy of 0.02pH
- Record/Recall up to 10 readings
- 4, 7 and 10pH Buffer recognition
- Memory saves last calibrated values
- Data Hold freezes current reading
- Automatic Temperature Compensation

ORP Features:

- Measures from -50 to 1000mV
- 4mV resolution and accuracy

Spare pH, ORP and BNC Modules are compatible with all pen models listed below.

Ordering Information:

05070Waterproof pH Pen

05072Waterproof ORP Pen

05074pH Pen with BNC Module

05076Spare pH Electrode Module

05077Spare ORP Electrode Module

05078Spare pH BNC Module

CA895.....Vinyl Pouch Carrying Case

60120B....pH Electrode with 39" Cable and BNC connector

650470Tripak buffer capsules (10 capsules each of pH 4, 7, 10)
